

# METROWEST TRANSLOAD

A MEMBER OF THE BNSF PREMIER TRANSLOAD NETWORK

## The Value of the Transload Network

As a member of the BNSF Premier Transload network, we enable you to ship on rail, even if your business isn't located on a rail line.

With access to the vast BNSF network, which stretches across the western two-thirds of the United States, you can get both the flexibility of road transportation and the long-haul economies of rail transportation.

You can rely on us to provide the best in trucking, warehousing, distribution and other services.

## Is Transload Shipping for Me?

Your business is likely to be a good candidate for transload shipping if it meets the following criteria:

- You'd like to reduce your transportation costs.
- Your business – or the facility where you ship goods – is not served by rail.
- You ship distances of more than 400 miles.
- You ship three or more truckloads at one time.

### Enhanced Efficiency and Cost Savings

Even if you have direct rail access, transload service may further enhance the efficiency of your shipping. Some customers have discovered, for example, that even though they have direct rail access, their efficiency is improved by using our transload service to smooth out inconsistencies in their supply chain.

And our transload service allows you to tap into the cost savings that shipping long-haul by rail typically delivers over entirely over-the-road options.

# Services to Meet Your Needs

With our transload service, you get not only the consistent and reliable service BNSF has built its reputation upon, but also an array of offerings.

## Facility Type

- Dimensional  
22 acres
- Warehouse  
4000 sq. ft
